Prime Minister Narendra
Modi launched
“Pradhanmantri Suryodaya
Yojana” in New Delhi on
January 22, 2024

Lord Ram was a Suryavanshi, and with this as an inspiration, the Government of Uttar Pradesh aims to develop Ayodhya as a model Solar City. The focus is to power every house, every office, every service in Ayodhya by solar power... I'm glad that many facilities and houses in Ayodhya are powered by solar energy. Additionally, many streetlights are solar-powered, and the city features solar intersections, solar boats, solar water ATMs, and solar buildings.

The Government has identified 17 such cities in India to be developed as solar cities, following the Ayodhya model. In addition, there are plans to leverage agricultural fields and farms as a medium of solar power generation. Today, the government is helping farmers to install solar pumps and small solar plants for irrigation.

PRIME MINISTER NARENDRA MODI

At the 4th Global Renewable Energy Investor's Meet and Expo (RE-INVEST) at Mahatma Mandir, Gandhinagar in Gujarat on 16 September 2024

Noida

Chief Minister of Uttar Pradesh, Yogi Adityanath inaugurated Avaada Group's 1.5 GW Solar Module Manufacturing Gigafactory in Noida and laid the foundation stone of Avaada Electro's ambitious 5 GW Integrated Solar Manufacturing Unit at Ecotech, Greater Noida.

योगी आदित्यनाथ

मुख्यमंत्री
उत्तर प्रदेश सरकार

संदेश

उत्तर प्रदेश में नवीकरणीय ऊर्जा स्रोतों से विद्युत उत्पादन की अपार संभावनाओं को ध्यान में रखते हुए एवं जलवायु परिवर्तन के वर्तमान और सम्भावित प्रभाव को महत्व देते हुए राज्य सरकार प्रदेश में स्वच्छ ऊर्जा स्रोतों को बढ़ावा देने के लिए संकल्पित है इसी क्रम में सौर ऊर्जा नीति-2022 के अन्तर्गत वर्ष 2027 तक कुल 22000 मेगावाट क्षमता की स्थापना लक्षित है।

इस नीति का उद्देश्य प्रदेश में सौर ऊर्जा उत्पादन और भंडारण के स्रोत में निजी क्षेत्र के निवेश के लिए अनुकूल वातावरण प्रदान करने के साथ रोजगार के अवसरों में बढ़ोत्तरी प्रदान कराना भी है।

प्रदेश सरकार के लोक कल्याण संकल्प पत्र -2022 में राज्य में प्रधानमंत्री कुसुम योजना के अन्तर्गत किसानों को सोलर पम्प प्रदान करने एवं किसानों की आय बढ़ाने के लिए सौर ऊर्जा से उत्पन्न अतिरिक्त विद्युत को बेचने के लिए उचित व्यवस्था कराने का संकल्प है। इसकी पूर्ति के लिए राज्य में क्रियान्वित प्रधानमंत्री कुसुम योजनान्तर्गत अनुसूचित जनजाति, वनटांगिया एवं मुसहर जाति के कृषकों को अपने स्थापित निजी ऑन ग्रिड पम्प अर्थात् नलकूपों को निःशुल्क सौर ऊर्जाकृत एवं अन्य कृषकों के नलकूपों को मात्र 10 प्रतिशत देय अंशदान के साथ सौर ऊर्जाकृत करने हेतु विशेष राज्यानुदान दिये जाने की व्यवस्था की गयी है।

सौर ऊर्जा नीति में निजी आवासों पर ग्रिड संयोजित रूफटॉप सोलर पावर प्लांट की स्थापना एवं बैटरी स्टोरेज के साथ सौर विद्युत परियोजना की स्थापना पर राज्यानुदान दिये जाने की व्यवस्था भी की गयी है।

राज्य में सोलर पावर पार्क एवं सौर विद्युत परियोजनाओं की स्थापना को बढ़ावा देने तथा इस क्षेत्र में अधिक रोजगार के अवसर सृजित करने के लिए नीति के अन्तर्गत विशेष प्रोत्साहन दिये जाने की व्यवस्था की गयी है।

मुझे पूर्ण विश्वास है कि नीति के क्रियान्वयन से ऊर्जा सुरक्षा व सम्यक ऊर्जा मिश्रण प्राप्त करने के साथ-साथ पर्यावरण को स्वच्छ रखने के उद्देश्य की पूर्ति भी होगी।

(योगी आदित्यनाथ)

Lord's Mark Industries: Pioneering Innovation and Sustainability to Shape India's Future

Lord's Mark Industries is leading a transformative journey in India's healthcare and energy sectors, making significant strides in MedTech, diagnostics, and renewable energy, while establishing a dominant presence in both domestic and international markets.

MedTech Innovation & IVD Excellence

A prominent player in India's In-Vitro Diagnostics (IVD) space, Lord's Mark Industries is now ranked as the fifth-best IVD brand in the country. With a cutting-edge manufacturing facility in Vasai, Mumbai, Lord's Mark is meeting the growing demand for high-quality diagnostic products, including a comprehensive range of rapid tests, biochemistry products, and analyser machines. In addition to this, the company is gearing up to establish Asia's second-largest biochemistry manufacturing unit in Maharashtra, further solidifying India's reputation in the global healthcare supply chain.

In the year 2023, Lord's Mark Industries has entered into an exclusive collaboration with the Indian Institute of Technology (IIT) Bombay to launch the first-ever artificial intelligence-enabled point of care testing equipment to screen sickle cell anaemia, an inherited blood disease.

In the field of genomic testing, Lord's Mark's genomics arm, OneDNA, is shaping the future of personalised healthcare in India. OneDNA offers advanced genetic testing services, empowering individuals with crucial insights into their genetic predispositions. OneDNA offers personalised treatment plans, improving disease prevention and management, especially for high-burden conditions such as cancer, diabetes, and cardiovascular diseases.

One of the company's standout innovations is the Oral Cancer Detection Technology. It is a non-invasive real-time diagnostic device that leverages optical spectroscopy to detect pre-cancerous and cancerous lesions in the oral cavity with 100% accuracy.

UPADHYAY**

Managing Director
Lord's Mark Industries Ltd.

Strengthening Regional Healthcare in SAARC Nations

Lord's Mark Industries is not only revolutionising healthcare in India but also expanding its footprint across the SAARC region. The company is focusing on providing reliable, affordable, and locally manufactured diagnostic solutions to neighboring countries such as Sri Lanka, Bangladesh, Nepal, and Pakistan. The company has set an ambitious target to export over 6.55 million diagnostic products to these countries.

Renewable Energy Leadership

In addition to healthcare, Lord's Mark is making significant contributions to the renewable energy sector. Recently, the company secured a landmark 150MW solar rooftop project at an impressive rate of Rs. 4.80 per unit, following the successful completion of a 50MW solar project. This expansion in solar energy demonstrates Lord's Mark's commitment to sustainability.

The company announced a significant milestone in its journey towards sustainable energy solutions at the World Economic Forum Annual Meeting 2025 in Davos. Lord's Mark Industries signed a Memorandum of Understanding (MoU) with the Government of Uttar Pradesh to establish a 300MW Solar Power Plant and a rooftop wind energy turbine in the state. This ambitious project involves a significant investment of Rs. 1,200 crores and reflects our unwavering commitment to advancing renewable energy infrastructure. Company is focussing in R&D and making in roads in BESS (Battery Energy storage system) in coming days.

Lighting and Energy Solutions

Lord's Mark Industries is also a dominant force in India's lighting sector, being the largest player in the RMS-based lighting domain. The company has partnered with Philips to distribute energy-efficient lighting solutions, establishing itself as a key channel partner in India. This collaboration further strengthens the company's position as a leader in the lighting industry.

Lord's Mark Industries is not merely a business entity but a beacon of innovation,

sustainability, and social impact. Through groundbreaking advancements in MedTech, personalised healthcare, and renewable energy, the company is redefining industry benchmarks while addressing some of the most pressing challenges faced by India and its neighbouring regions. Its commitment to excellence, sustainability, and community empowerment reflects a forward-thinking vision that aligns with India's aspirations for a healthier, greener, and more inclusive future. As Lord's Mark Industries continues to expand its horizons and innovate across diverse sectors, it is poised to play a pivotal role in shaping a resilient and sustainable India on the global stage.

LORDS TURBO

ENERGY BOUNDLESS, POWER LIMITLESS

- Integrated Solutions from hardware to cloud-based energy management.
- Scalable, Safe & Smart—designed for future-ready energy ecosystems.
- Global Compliance and proven track record in real-world deployments.
